

# Tallinn Children's Hospital – fast, sharp, innovative.

The world-class treatment for children in Estonia

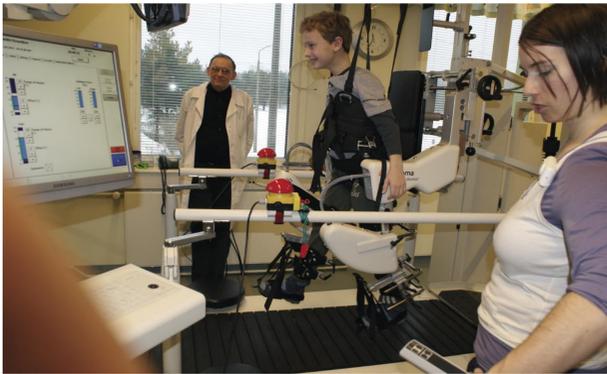

## WHO WE ARE?

Tallinn Children's Hospital is the only tertiary level independent multiprofile children's hospital, where the treatment is provided to two thirds of Estonian children.

The hospital is represented in all specialities of pediatrics and pediatric surgery.

We use the evidence-based diagnostics and therapeutic methods and we have modern equipment, included the Pediatric Lokomat Robot.

We are the leading children's orthopedic center in Estonia, as well as Spina Bifida & Hydrocephalus treatment center.

In today's globalized world, our doctors often consult with the colleagues from EU Clinics: such as the Charité University Hospital (Berlin), Karolinska University Hospital (Stockholm), Helsinki University Hospital and the leading genetic centers. Skype is a convenient tool for consultations.

The new facility of the Mental Health Center for Children and Adolescents in Tallinn will be opened in 2016. The construction is financed by the Programme of the Norwegian Financial Mechanism 2009–2014.

## DEPARTMENTS & AMBULATORY SERVICES

Beds – 163  
Physicians – 123  
Nurses – 266  
In-patients in year – 12, 000  
Out-patients in year – 172 259

## CHARITY IN THE HOSPITAL

The first gradual renovation from basement to the roof took place in 1993–2005.

Two thirds from 140 million EEK (894,763 EUR) used for renovation, was raised by charity. The part of philanthropy was especially important in the 90s.

The Tallinn Children's Hospital Foundation was founded in 1993.

Children's Hospital has also a lot of partners, who care for sick children: such as My Dream Day Foundation, Doctor Clowns etc.

## HISTORY

**1979** – Hospital was built and named Tallinn Children's Clinical Hospital  
**2002** – all children's hospitals in Tallinn were united. Tallinn Children's Hospital was created
